No worries. I haven't had the chance to look since around noon and had some questions back in with the program.

I just went into the press release and made more changes/edits. I don't think the science is explained in a way that the uninitiated can understand it, and I don't think the needle is quite threaded – I am going to mess with it a bit more. Sorry. 😊

Michal Ilana Freedhoff, Ph.D.

I know that PTSLO has been in the documents throughout the day. I'm going to do one more read through this evening.

I also just received the revised rule. Will look at that tonight, as well. I'm told that the OGC IO has signed off.

Also noting for you that Susannah Weaver from OGC would like to see these materials – I assume you've been working with PTSLO staff on them throughout, right?

Will a new draft of the release be ready soon for me to share with AO/Lindsay/Radha/etc?

Thanks
michal

Hi Michal – here are the draft comms we’ve been working on. The roll out and web in particular are still works in progress. Let me know if you can’t access these files. We also need to decided what, if anything, to do with the [Columbia data webpage](#) and the web page with the [Letter in Support of September 2018 Department of Justice Action on Chlorpyrifos](#). I’m thinking we archive them, which means removing them from our live website and putting them on archive.epa.gov so they are still publicly accessible.
